METHOD AND APPARATUS FOR ONLINE HEALTH MONITORING

EXAMINER'S COURTESY COPY OF PENDING CLAIMS

Hon. Commissioner of Patents and Trademarks Washington, DC 20231 RECEIVED

June 14, 2002

Sir:

GROUP 3600

A method for compiling health information, performed by a computer-1. controlled apparatus, the method comprising:

establishing a database for storing a plurality of health statuses of a plurality of users, wherein the database is centrally-accessible;

receiving, from a user, data corresponding to a health statistic of the user, the data generated by a health monitoring device;

determining a health status of the user from the health statistic;

storing the health status in the database; and

updating a population statistic based on the health status and the plurality of

health statuses.

2. The method of claim 1, wherein the database is accessible from the Internet.

3. The method of claim 1, wherein the health statistic comprises cardiovascular

data.

4. The method of claim 2, wherein the cardiovascular data corresponds to a

blood pressure of the user.

5. The method of claim 1, wherein the health monitoring device comprises an

electret transducer.

6. The method of claim 5, wherein the data comprises acoustic data from the

electret transducer, the acoustic data including at least one waveform.

7. The method of claim 6, wherein the analyzing step further comprises:

measuring at least one of a shape of the waveform, a slope of the waveform,

and an area under the waveform;

determining a cardiovascular age factor of the user based on the measuring

step; and

storing the cardiovascular age factor in the database as the health status.

8. The method of claim 7, further comprising:

Serial No. 09/404,269

Response to Office Action dated May 14, 2002

Docket No. 7415/0G062

Page 2

9. The method of claim 1, wherein the receiving step further comprises: receiving, from the user, a request to store the data; receiving a financial account identifier corresponding to a financial account; and charging a fee against the financial account in response to the request.

10. The method of claim 1, wherein the receiving step further comprises:
receiving user identification data corresponding to the user including at least
one of: a name, an address, a login name, a password, a health care provider, a
health insurance provider, a time that the first data was generated, and a financial
account identifier corresponding to a financial account; and

receiving user medical data corresponding to the user including at least one of: an age, a height, a weight, an activity level, an ethnic group, a medical history, and a family medical history.

- 11. The method of claim 10, wherein the storing step further comprises: storing the user identification data and user medical data in the database.
- 12. The method of claim 10, wherein the analyzing step further comprises:

 determining a cardiovascular age factor of the user based on the data and at
 least a portion of the user medical data; and
 storing the cardiovascular age factor in the database.
- 13. The method of claim 12, further comprising:

Serial No. 09/404,269
Response to Office Action dated May 14, 2002

14. The method of claim 1, further comprising:
receiving, from a second user, a request for the health status; and providing the health status to the second user.

15. The method of claim 14, wherein the providing step further comprises:
receiving, from the second user, a financial account identifier corresponding a
financial account; and
charging a fee to the financial account in response to the request.

- 16. The method of claim 14, wherein the health status is provided and an identity of the first user is withheld.
- 17. The method of claim 14, further comprising:

 determining a plurality of population health statistics from the plurality of health statuses, including the first health status.
- 18. The method of claim 17, further comprising: receiving, from a second user, a request for at least a portion of the population health statistics; and providing the requested portion of population health statistics to the second

19. The method of claim 18, wherein the providing step further comprises:

Serial No. 09/404,269 Response to Office Action dated May 14, 2002

user.

receiving a financial account identifier corresponding to a financial account;

and

charging a fee against the financial account, in response to the request.

20. The method of claim 1, further comprising:

receiving, from a second user, second data corresponding to a health statistic

of the second user.

21. The method of claim 1, further comprising:

receiving, from the user, second data corresponding to the health statistic of

the user at a separate time;

analyzing the second data to generate a second health statistic of the user;

and

storing the second health statistic of the user.

22. A method, performed by a computer-controlled apparatus, for submitting

acoustical cardiovascular data to a central database, the method comprising:

receiving, from a user, a request to detect a cardiovascular signal of the user;

initializing a cardiovascular monitoring device connected to a computer in

response to the request;

measuring the cardiovascular signal during a startup routine performed by the

computer;

receiving, at the computer, at least a portion of the detected cardiovascular

signal of the user; and

transmitting data based on the received cardiovascular signal to a central

database for storage in a record corresponding to the user.

Serial No. 09/404,269
Response to Office Action dated May 14, 2002

Docket No. 7415/0G062

Page 5

23. The method of claim 25, wherein the step of receiving a request further comprises:

receiving, from the user, user identification data corresponding to the user including at least one of: a name, an address, a login name, a password, a health care provider, a health insurance provider, a time that the request was generated, and a financial account identifier corresponding to a financial account;

receiving user medical data corresponding to the user including at least one of: an age, a height, a weight, an activity level, an ethnic group, a medical history, and a family medical history; and wherein the transmitting step further comprises:

transmitting at least a portion of one of the user identification data and the user medical data to the central database.

- 24. The method of claim 25, wherein the cardiovascular monitoring device comprises an electret transducer.
- 25. The method of claim 25, wherein the cardiovascular signal is an acoustic signal, the method further comprising:

analyzing a waveform of the acoustic signal to determine at least one of a shape of the waveform, a slope of the waveform, and an area under the waveform; and

determining a cardiovascular age factor of the user based on the measuring step; and wherein the transmitting step further comprises:

transmitting the cardiovascular age factor to the central database.

26. The method of claim 25, wherein the transmitting step further comprises: transmitting the data to the central database through one of a modem connection and the Internet.

Serial No. 09/404,269 Response to Office Action dated May 14, 2002 determining a health status of the user from the health statistic;

storing the health status in the database; and

updating a population statistic based on the health status and the plurality of

health statuses.

2. The method of claim 1, wherein the database is accessible from the Internet.

3. The method of claim 1, wherein the health statistic comprises cardiovascular

data.

4. The method of claim 2, wherein the cardiovascular data corresponds to a

blood pressure of the user.

5. The method of claim 1, wherein the health monitoring device comprises an

electret transducer.

6. The method of claim 5, wherein the data comprises acoustic data from the

electret transducer, the acoustic data including at least one waveform.

7. The method of claim 6, wherein the analyzing step further comprises:

measuring at least one of a shape of the waveform, a slope of the waveform,

and an area under the waveform;

determining a cardiovascular age factor of the user based on the measuring

step; and

storing the cardiovascular age factor in the database as the health status.

8. The method of claim 7, further comprising:

Serial No. 09/459,307

Response to Office Action dated June 1, 2001

Docket No. 7415/0F930

Page 2

9. The method of claim 1, wherein the receiving step further comprises: receiving, from the user, a request to store the data; receiving a financial account identifier corresponding to a financial account; and charging a fee against the financial account in response to the request.

10. The method of claim 1, wherein the receiving step further comprises:
receiving user identification data corresponding to the user including at least
one of: a name, an address, a login name, a password, a health care provider, a
health insurance provider, a time that the first data was generated, and a financial
account identifier corresponding to a financial account; and

receiving user medical data corresponding to the user including at least one of: an age, a height, a weight, an activity level, an ethnic group, a medical history, and a family medical history.

- 11. The method of claim 10, wherein the storing step further comprises: storing the user identification data and user medical data in the database.
- 12. The method of claim 10, wherein the analyzing step further comprises:

 determining a cardiovascular age factor of the user based on the data and at least a portion of the user medical data; and storing the cardiovascular age factor in the database.
- 13. The method of claim 12, further comprising:

Serial No. 09/459,307 Response to Office Action dated June 1, 2001

- 14. The method of claim 1, further comprising: receiving, from a second user, a request for the health status; and providing the health status to the second user.
- 15. The method of claim 14, wherein the providing step further comprises:
 receiving, from the second user, a financial account identifier corresponding a
 financial account; and
 charging a fee to the financial account in response to the request.
- 16. The method of claim 14, wherein the health status is provided and an identity of the first user is withheld.
- 17. The method of claim 14, further comprising:

 determining a plurality of population health statistics from the plurality of health statuses, including the first health status.
- 18. The method of claim 17, further comprising:
 receiving, from a second user, a request for at least a portion of the
 population health statistics; and
 providing the requested portion of population health statistics to the second
- 19. The method of claim 18, wherein the providing step further comprises: receiving a financial account identifier corresponding to a financial account;

Serial No. 09/459,307 Response to Office Action dated June 1, 2001

user.

and

charging a fee against the financial account, in response to the request.

20. The method of claim 1, further comprising:

receiving, from a second user, second data corresponding to a health statistic of the second user.

21. The method of claim 1, further comprising:

receiving, from the user, second data corresponding to the health statistic of the user at a separate time;

analyzing the second data to generate a second health statistic of the user; and

storing the second health statistic of the user.

22. A method, performed by a computer-controlled apparatus, for submitting acoustical cardiovascular data to a central database, the method comprising: receiving, from a user, a request to detect a cardiovascular signal of the user; initializing a cardiovascular monitoring device connected to a computer in response to the request;

measuring the cardiovascular signal during a startup routine performed by the computer;

receiving, at the computer, at least a portion of the detected cardiovascular signal of the user; and

transmitting data based on the received cardiovascular signal to a central database for storage in a record corresponding to the user.

23. The method of claim 25, wherein the step of receiving a request further

Serial No. 09/459,307 Response to Office Action dated June 1, 2001 comprises:

receiving, from the user, user identification data corresponding to the user

including at least one of: a name, an address, a login name, a password, a health

care provider, a health insurance provider, a time that the request was generated,

and a financial account identifier corresponding to a financial account;

receiving user medical data corresponding to the user including at least one

of: an age, a height, a weight, an activity level, an ethnic group, a medical history,

and a family medical history; and wherein the transmitting step further comprises:

transmitting at least a portion of one of the user identification data and the

user medical data to the central database.

24. The method of claim 25, wherein the cardiovascular monitoring device

comprises an electret transducer.

25. The method of claim 25, wherein the cardiovascular signal is an acoustic

signal, the method further comprising:

analyzing a waveform of the acoustic signal to determine at least one of a

shape of the waveform, a slope of the waveform, and an area under the waveform;

and

determining a cardiovascular age factor of the user based on the measuring

step; and wherein the transmitting step further comprises:

transmitting the cardiovascular age factor to the central database.

26. The method of claim 25, wherein the transmitting step further comprises:

transmitting the data to the central database through one of a modem

connection and the Internet.
